

Hi Alan

Still no home access to landline or internet, that will probably be sorted out later on in the week. Depending which way the wind is blowing.

I forgot to tell you that there was another accident last week, Tuesday I think. Two cars trying to get into the Texaco garage at the same time as one was coming out. Relatively minor bump but that brings the total this year to 8 that I or my wife has witnessed. 3 close to or at the Garage, 2 at New Lane Junction, 1 at Rose and Crown. 1 at the bottom of the hill on Southport Rd and a tractor that managed to lose it's load at New Lane Junction, with giant bales of hay everywhere. Not to mention something mysteriously damaging our front wall at the beginning of the year nor the phone cables being brought down by a crane 11 days ago.

I've raised most of this in the prison objections before and I had also contacted Katherine Fletcher MP to raise concerns about the prison and the likely increase in traffic and accidents upon Southport Rd. This year has been particularly bad for accidents. Most relatively minor but it is only a matter of time before somebody is killed. For the record, I have also contacted Highways before and raised an freedom of information request to get access to some traffic data for Southport Rd itself.

Best Wishes

Paul
