

Chorley Open Space, Sports and Recreation Strategy (OSSR) Action Plan 2020 to 2036

(FINAL)

Foreword

I am pleased to introduce our Open Space, Sports and Recreation Strategy Action plan for 2020 to 2036. Open spaces, pitches and recreation facilities across the Borough are highly valued by our residents and visitors alike and we pride ourselves on investing in and maintaining these assets to ensure they continue to meet the needs and expectations of communities. The COVID-19 pandemic has turned the spotlight on our greenspaces, and they have seen a huge increase in usage throughout the pandemic reigniting the love and affinity for assets close to home. This has instilled how important it is to have free access to good quality parks and open spaces.

Much of the open space, sports and recreation facilities in our borough belong to Chorley Council although there are many others run by a variety of sports clubs, schools, parish councils and private organisations. This strategy takes a holistic view across all sites, to ensure we are joined up, looking after our spaces, innovating, nurturing, developing and investing our money in places people can enjoy with their friends and family, creating healthy, resilient communities.

Chorley Council has a proven track record of working in collaboration with stakeholders, partners, funding bodies, customers and parish councils to invest in our open spaces, which can range from engagement and sharing of expertise, to providing capital investment and project management. We work hard to attract investment to improve our assets such as playing pitches, playgrounds, natural habitats and parks as we value the pleasure and health benefits they bring to local people. We are also very focused on the climate change agenda, utilising our land and working in collaboration with others where possible on initiatives such as natural flood management, increasing biodiversity and tree planting to create a resilient sustainable Borough.

We are proud of the open space sports and recreation facilities we have on offer at Chorley and we are committed to delivering the improvements highlighted within our strategy.

Councillor Alistair Morwood

Exec Member of Planning and Development

Introduction to the Open Space Sports and Recreation Strategy Action Plan

This Open Space Sports and Recreation Strategy (OSSR) Action Plan sets out how Chorley Council plans to invest in our open spaces over the next ten to fifteen years. This includes recreation grounds, parks, playing pitches, allotments and other open spaces which are available for use by the public. By taking a strategic approach, we can make the best use of our existing assets and ensure the delivery of our regeneration priorities, targeting investment to where it is needed and working with our partners to attract grant funding and resources needed to make it happen. The strategy action plan focuses on sites that need to be improved or sustained to ensure they remain fit for purpose and continue to benefit the residents of our borough, whilst also seeking to address issues of a lack of supply of certain typologies.

Access to open space and opportunities for sport and recreation are important for physical and mental health and wellbeing, improving the quality of life for our residents and visitors. Green spaces also provide natural infrastructure that enables communities to deal with floods and contribute to combatting climate change whilst providing wildlife habitats, open space for amenity, recreational sporting facilities and beautiful parks.

The OSSR Strategy Action Plan is a summary document which pulls together the strands from the suite of technical evidence documents produced by consultants, Knight Kavanagh Page (KKP). This technical evidence has two main functions. Firstly, it informs the local development plan, guiding the location for new provision and the requirement for developer contributions towards open space. Secondly, the evidence supports investment decisions and guides how we manage our open spaces in Chorley, which are then shaped into the local OSSR Strategy Action Plan.

KKP undertook comprehensive assessments across Central Lancashire as part of the preparation for the new Central Lancashire Local Plan, producing very detailed, technical documents which cover the three Boroughs of Preston, Chorley and South Ribble. As evidence documents, consultants worked very closely with a very wide variety of stakeholders across the three districts including all the sports clubs, teams, site users, National Governing Bodies as well as parish councils and elected members in order to produce robust, accurate data.

The full suite of technical documents is available to view on the council's website by clicking on the links below:

- Central Lancashire Open Space Assessment. This can be found [here](#)
- Chorley Council Open Space Study Standards Paper. This be found [here](#)
- Central Lancashire Playing Pitch Strategy Assessment Report. This can be found [here](#)
- Central Lancashire Strategy and Action Plan. This can be found [here](#)

The council are required to undertake these studies in order to support the development of the emerging Central Lancashire Local Plan and these will inform the investment of the councils' resources both in terms of staff time but also capital funding, such as that collected from developer contributions.

The evidence supports:

- Preparation of policies
- Site allocation processes
- Development of an Infrastructure Delivery Plan (IDP)

What is the Chorley Open Space, Sports and Recreation Strategy Action Plan?

The strategy action plan focuses on sites identified through the site assessments which are proposed to be enhanced, where new provision is to be created or sites where partnership working is advocated. This covers all sites of main pitch sports including football, cricket, rugby union, rugby league and hockey and assess both grass pitches and artificial pitches. In addition, it also includes other outdoor sports facilities including tennis, bowls, golf, cycling and athletics (including formal running clubs) and open spaces including parks, amenity, cemeteries, civic spaces and allotments.

This document includes a short summary of all typologies of open space, sports and playing pitches and focuses on a comprehensive strategy action plan. The strategy action plan includes:

- a) Schemes to be carried forward from the previous Play, Open Space and Playing Pitch Strategy Action plan 2014-2019. These are schemes are either underway or are awaiting the necessary funding required.
- b) Schemes identified as high and medium priority by KKP (which may include some projects which are complicated to enable/deliver, for example non-council owned assets).
- c) Schemes which are identified as a Chorley Council Corporate Strategy Projects.
- d) Schemes which are identified as neighbourhood priority projects.

KKP identified some low priority actions (many of which refer simply to 'ongoing maintenance') and these have been excluded from the OSSR Strategy Action Plan for now, to be reviewed as part of the ongoing review of this action plan.

What will the Open Space Sports and Recreation Strategy do?

The vision for the Open Space, Sport and Recreation Strategy Action Plan is based on the Central Lancashire approach.

“To create high quality, sustainable outdoor sports, recreation and open space facilities which meet community need, increase participation, help tackle health issues and provide accessible, inclusive activities for Central Lancashire residents as part of an active lifestyle.”

To achieve this vision, this strategy action plan will guide investment and aim to deliver the following objectives;

- ◀ **Protect** - Ensure that all valuable facilities are protected.
- ◀ **Promote** - To promote a sustainable approach to the provision of playing pitches and management of sports clubs.
- ◀ **Meet Demand** - Ensure that there are enough facilities in the right place to meet current and projected future demand.
- ◀ **Quality of Facilities** - Ensure that all sports and recreation clubs have access to facilities of appropriate quality to meet current needs and longer-term aspirations.

As well as looking at the existing provision, the council needs to consider the future requirements for provision based upon population distribution, planned growth and consultation findings, which will shape the future provision of accessible and high-quality provision for open spaces

Policy Context

The Strategy Action Plan is aligned to policies, aims and aspirations contained in national, regional and local documents and plans. Locally the key document is the Chorley Council Corporate Strategy which identifies our key priorities as a Council which are:

- Involving residents in improving their local area and equality of access for all;
- Clean, safe and healthy homes and communities;
- A strong local economy; and
- An ambitious council that does more to meet the needs of residents and the local area.

For full details please visit the website [here](#)

About the Open Space, Sports and Recreation Sites

The supporting evidence prepared by KKP for the three Central Lancashire councils provides the detail about what open space provision there is in the borough and its condition, the distribution of provision taking account of population across the borough, and the overall quality, based on the findings of the research, consultation, site assessments, data analysis and GIS mapping undertaken as part of the study.

The supporting evidence considers the supply and demand issues for open space provision across the area taking account of each typology and the action plan identifies the work required to retain, improve and enhance these various sites. There are hundreds of sites across the Borough and the tables in Appendix A detail the different types of open space, its primary purpose and provides a list of the sites across Chorley. The typologies of open space are as follows:-

Typology	Primary purpose
Parks and gardens	Accessible, high quality opportunities for informal recreation and community events.
Natural and semi-natural greenspaces	Wildlife conservation, biodiversity and environmental education and awareness.
Amenity greenspace	Opportunities for informal activities close to home or work or enhancement of the appearance of residential or other areas.
Provision for children and young people	Areas designed primarily for play and social interaction involving children and young people, such as equipped play areas, MUGAs, skateboard areas and teenage shelters.
Allotments	Opportunities for those people who wish to do so to grow their own produce as part of the long term promotion of sustainability, health and social inclusion.
Cemeteries, disused churchyards and other burial grounds	Quiet contemplation and burial of the dead, often linked to the promotion of wildlife conservation and biodiversity.
Green corridors	Areas or route which provide walking, cycling or horse riding, whether for leisure purposes or travel. May also offer opportunities for wildlife migration.
Civic Space	Including civic and market squares, and other hard surfaced areas designed for pedestrians

The following outdoor sports facilities have been assessed to inform provision across the Borough.

Football, Third Generation (3G) and Artificial Grass Pitches (AGP), Cricket, Rugby Union, Rugby League, Hockey, Golf, Bowls, Tennis, Athletics and Cycling.

How We Assess the Quality and Value of Our Open Spaces

To inform the development of the Open Space Sports and Recreation Strategy Action plan, each type of open space in Chorley has been assessed for quality and value to help inform how we prioritise future investment and to identify sites that may be surplus within and to a particular open space typology.

Quality and value are fundamentally different and can be unrelated, for example, a high-quality space may be inaccessible and so be of little value to the community whereas a rundown (poor quality) space may be the only one in an area and thus be immensely valuable. The quality criteria used for the open space assessments is summarised in the table below:

Quality and Value Criteria

Quality criteria for open spaces

- Physical access, e.g. public transport links, directional signposts,
- Personal security, e.g. site is overlooked, natural surveillance
- Access-social, e.g. appropriate minimum entrance widths
- Parking, e.g. availability, specific, disabled parking
- Information signage, e.g. presence of up to date site information, notice boards
- Equipment and facilities, e.g. adequacy and condition of provision such as seats, benches, bins, toilets
- Site problems, e.g. presence of vandalism, graffiti
- Healthy, safe and secure, e.g. fencing, gates, staff on site
- Maintenance and cleanliness, e.g. condition of general landscape & features
- Groups that the site meets the needs of, e.g. elderly, young people

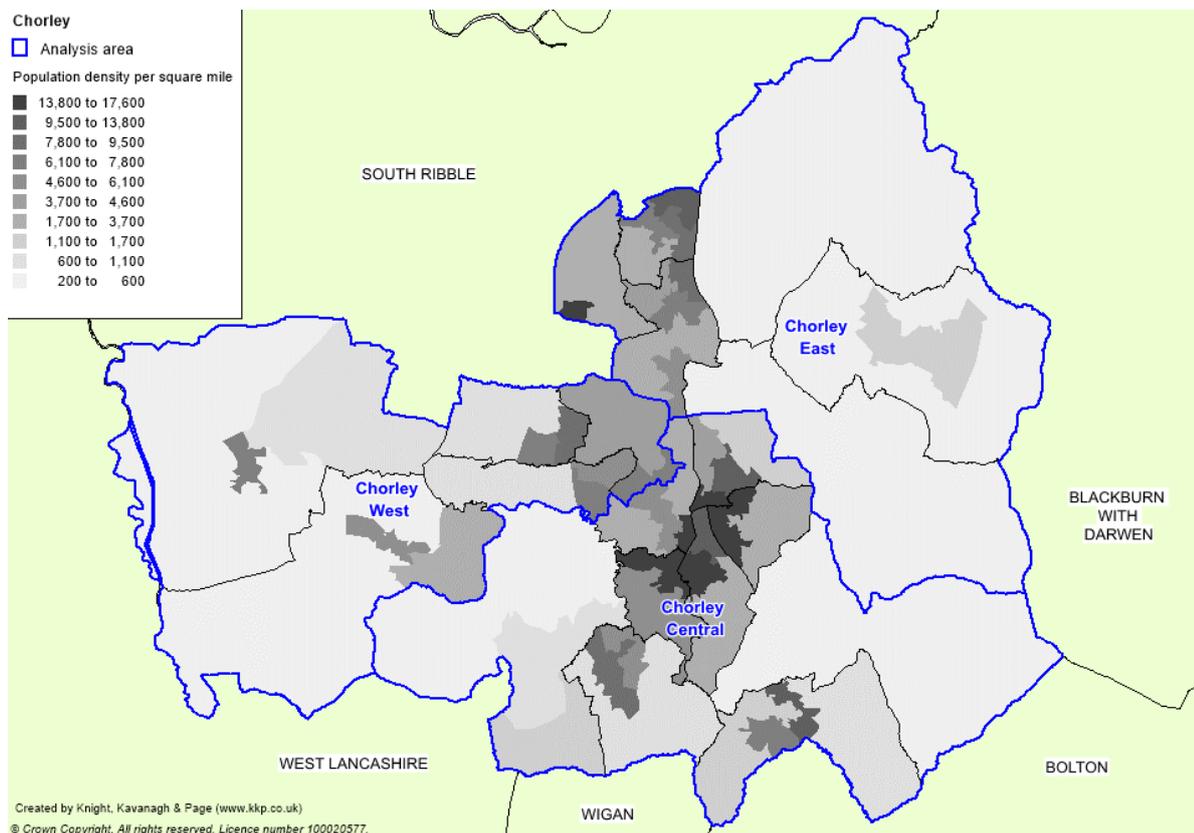

Value criteria for open spaces

- Level of use (observations only), e.g., evidence of different user types (e.g. dog walkers, joggers, children) throughout day, located near school and/or community facility
- Context of site in relation to other open spaces and proximity to housing
- Structural and landscape benefits, e.g., well located, high quality defining the identity/ area
- Ecological benefits, e.g., supports/promotes biodiversity and wildlife habitats
- Educational benefits, e.g., provides learning opportunities on nature/historic landscapes
- Social inclusion and health benefits, e.g., promotes civic pride, community ownership and a sense of belonging; helping to promote physical and mental well-being

- Cultural and heritage benefits, e.g., historic elements/links (e.g. listed building, statues) and high-profile symbols of local area
- Amenity benefits and a sense of place, e.g., attractive places that are safe and well maintained; helping to create specific neighbourhoods and landmarks
- Economic benefits, e.g., enhances property values, promotes economic activity and attracts people from near and far.

For full details as to how Chorley Open Space Sites were assessed, please see the appropriate section of the Open Space Standards Papers.

The Borough was split into 3 areas for analysis purposes, Chorley Central, Chorley East and Chorley West.

Summary of the Quality and Value of Our Open Spaces

This is a summary of the findings of the detailed evidence which outlines key facts and figures about the open spaces, parks and recreation provision across Chorley. The evidence was gathered in 2018 and therefore given there is new provision being created through new developments (such as on-site play provision or new bespoke sports schemes), and sites are enhanced through the strategy delivery the data may be subject to change.

Parks and Gardens

There are 18 sites in Chorley classified as parks and gardens totaling over 196 hectares equivalent to 1.70 ha per 1,000 population. The evidence found that areas of higher population density are generally covered by the catchment of at least one park site, although the Chorley East Analysis Area has a noticeable gap which is likely to be served by other forms of provision such as Cuerden Valley Park (included as natural and semi-natural greenspace).

41% of Chorley residents who responded to the survey conducted by KKP reported being very satisfied with the amount/availability of parks in the area, a further 38% of residents stated they are quite satisfied.

All park sites in Chorley were found to score above the threshold for value and across all of Central Lancashire, the Green Flag site of Astley Park scored the highest for value. It contains Astley Hall, a Grade I listed historic house and a war memorial and KKP Consultants concluded that Astley Park 'is observed as a lovely, attractive park that is well used and maintained therefore, also scores high for structural and landscape benefits. Furthermore, it has an active friends group helping to support its range of benefits' (KKP 2019 p:25).

Green Flag

The Green Flag Award scheme is licensed and managed by Keep Britain Tidy. It provides national standards for parks and greenspaces across England and Wales and public service agreements, identified by the Ministry for Housing Communities and Local Government (MHCLG) highlight the importance placed on Green Flag status as an indicator of high quality. This in turn impacts upon the way parks and gardens are managed and maintained. To gain the award, sites must be maintained and managed to a high standard and Chorley Council are proud to have six sites which hold the Green Flag Award, most of which are classified in the parks and gardens typology, specifically:

- ◀ Astley Park
- ◀ Coronation Rec Ground
- ◀ Tatton Recreation Ground

The others are amenity greenspaces or natural/semi-natural greenspaces:

- ◀ Withnell Local Nature Reserve
- ◀ Yarrow Valley Country Park

◀ Cuerden Valley Park, Clayton-le-Woods

Harpers Recreation Ground has been entered for Green Flag Award for the first time in 2021 and awaits the result.

Natural and Semi-natural Greenspace

The natural and semi-natural greenspaces can include woodland and scrub, grassland, heath or moor, wetlands, wastelands, and bare rock habitats and commons. Such sites are often associated with providing wildlife conservation, biodiversity and environmental education and awareness. In Chorley there are 43 accessible sites equivalent to over 733 hectares and as national guidance recommends a standard of 1.80ha per 1,000 population, Chorley exceed this at 6.34 per 1,000 population.

Amenity Greenspace

Chorley has 131 amenity greenspace sites totalling 97 hectares equating to over 97 hectares of provision. Proportionally, more provision is located in Chorley East (0.97 ha per 1,000 population) and Chorley West Analysis Areas (1.18 ha per 1,000 population) compared to Chorley Central Analysis Area (0.64 ha per 1,000 population). Fields in Trust guidance suggests a standard of 0.60 ha per 1,000 population and overall, Chorley has 0.85 ha per 1,000 population which exceeds this and spatially, there is a good distribution of amenity greenspace across the borough. Almost three quarters of amenity sites were assessed as above the threshold for quality. The majority of sites to score lower for quality is due to a lack of ancillary features such as benches or signage.

In addition to its multifunctional role, amenity greenspace makes a valuable contribution to visual aesthetics for communities and therefore all sites rate above the value threshold.

Provision for Children and Young People

There are 108 play sites in Chorley, a total of over 10 hectares and there is a good spread of provision across the borough. All areas with a greater population density are within walking distance of a form of play provision. A greater proportion of play sites (69%) rate above the threshold for quality. The lower quality scoring sites generally reflected a lack in and/or range of equipment and/or its general condition and the majority of sites rate above the threshold for value reflecting the social, healthy and developmental benefits provision can provide.

Allotments

The value of allotments is widely recognised due to the associated social inclusion, health benefits and the sense of place they offer.

There are 20 allotments sites in Chorley equating to over eight hectares which represents 0.08 hectares per 1,000 population which is below the National Society of Allotments and Leisure Gardens recommended amount of 0.25 hectares per 1000 people. None of the individual analysis

areas meet the standard although the catchment mapping does not highlight any significant gaps in provision within a 15-minute drive.

Cemeteries and Churchyards

In Chorley there are 19 cemeteries and churchyards, equating to over 33 hectares and the largest site is Charnock Richard Crematorium (11.38 hectares). It is the only crematorium in the area. No standards are set for cemeteries. The need for additional cemetery provision should be driven by the requirement for burial demand and capacity.

Green Corridors

There are 13 main green corridors identified in Chorley and all, but one site scored above the quality threshold. The sites offer important recreational opportunities such as walking and cycling as well as attracting visitors to the area. They also provide important habitat and wildlife benefits.

Civic Space

There are three sites classified as civic space. They score well above the quality and value threshold.

Playing Pitch Sports:

The detail relating to playing pitches and sports is included within the Playing Pitch Strategy (PPS) Assessment Report which looks at demand and supply across the borough seeking to deliver these objectives:

- Ensure that all valuable facilities are protected for the long- term benefit of sport
- Promote a sustainable approach to the provision of playing pitches and management of sports clubs
- Ensure that there are enough facilities in the right place to meet current and projected future demand.
- Ensure that all clubs have access to facilities of appropriate quality to meet current needs and longer- term aspirations.

Planning Practice Guidance uses the following definitions of a playing pitch and playing field. These definitions are set out by the Government in the 2015 ‘Town and Country Planning (Development Management Procedure) (England) Order’.ⁱ

Playing pitch is defined as a delineated area of 0.2 ha or more which is used for association football, rugby, cricket, hockey, lacrosse, rounders, baseball, softball, American football, Australian football, Gaelic football, shinty, hurling, polo or cycle polo.

Playing field – the whole of a site which encompasses at least one playing pitch.

Although the statutory definition of a playing field sets out a minimum pitch size of 0.2 ha, this PPS considers smaller sized sites that contribute to the supply side, for example, a site containing a mini 5v5 football pitch. This PPS counts individual grass pitches (as a delineated area) as the basic unit of supply. The definition of a playing pitch also includes artificial grass pitches (AGPs).

As far as possible, the assessment report aims to capture all of the outdoor sports facilities within Central Lancashire, although there may be instances, for example, on school sites, where access was not possible and has led to omissions within the report (although facilities at sites not accessed are still included within the PPS where provision is known to exist from other data sources). Where pitches have not been recorded within the report, they remain as pitches and for planning purposes continue to be so. Furthermore, exclusions of a pitch do not mean that it is not required from a supply and demand point of view.

Match equivalent sessions (MES)

Playing pitches have a limit of how much play they can accommodate over a certain period of time before their quality, and in turn their use, is adversely affected. As the main usage of pitches is likely to be for football matches, it is appropriate for the comparable unit to be match equivalent sessions but may for example include training sessions.

Based on how they tend to be played this unit for football, rugby union and rugby league pitches relate to a typical week within the season for each sport. For cricket pitches it is appropriate to look at the number of match equivalent sessions (MES) over the course of a season.

Pitch capacity

The capacity for pitches to regularly provide for competitive play, training and other activity over a season is most often determined by pitch quality. As a minimum, the quality and therefore the capacity of a pitch affects the playing experience and people's enjoyment of playing football. In extreme circumstances it can result in the inability of the pitch to cater for all or certain types of play during peak and off peak times. Pitch quality is often influenced by weather conditions and drainage. As a guide, each National Governing Body has set a standard number of matches that each grass pitch type should be able to accommodate without adversely affecting its current quality (pitch capacity).

Future demand is an informed estimate made of the likely future demand for pitches in the study area. This is generally based on the most appropriate current and future population projections for the relevant age and gender groupings for each sport. Key trends, local objectives and targets and consultation also inform this figure.

Casual use or other use could take place on natural grass pitches or AGPs and include:

- Regular play from non-sports club sources (e.g. companies, schools, fitness classes)
- Infrequent informal/friendly matches or training sessions

- More casual forms of a particular sport organised by sports clubs or other parties
- Significant public use and informal play, particularly where pitches are located in parks/recreation grounds.

The quality of playing pitch ancillary facilities has been assessed via a combination of site visits and user consultation to reach and apply an agreed rating as follows:

- Good
- Standard
- Poor

The ancillary facility rating is primarily influenced by the type of amenities which are available on a site accompanied by their quality, such as a clubhouse, changing rooms, showering provision, car parking, dedicated official and spectator facilities and boundary fencing.

Chorley Playing Pitches Headline Analysis

Sport	Current Picture (match equivalent sessions MES)	Future Picture to 2036
Football (grass pitches)	<p>Adult pitches have spare capacity of 2 MES per week</p> <p>Youth 11v11 pitches overplayed by 2 MES per week</p> <p>Youth 9v9 pitches have spare capacity of 0.5 MES per week</p> <p>Mini 7v7 pitches have spare capacity of 1.5 MES per week</p> <p>Mini 5v5 pitches have spare capacity of 2 MES per week</p>	<p>Adult pitches have spare capacity of 1 MES per week</p> <p>Youth 11v11 pitches overplayed by 12 MES per week</p> <p>Youth 9v9 pitches overplayed by 1 MES per week</p> <p>Mini 7v7 pitches have spare capacity of 0.5 MES per week</p> <p>Mini 5v5 pitches are overplayed by 0.5 MES per week</p>
Football (3G pitches)	Shortfall of 4 full sized 3G pitches for team training	Shortfall of 5 full sized 3G pitches for team training
Rugby union (senior pitches)	<p>Senior pitches at capacity</p> <p>Mini pitches at capacity</p>	<p>Senior pitches at capacity</p> <p>Mini pitches at capacity</p>
Rugby league (senior pitches)	Senior pitches are overplayed by 4.5 MES	Senior pitches are overplayed by five MES

Sport	Current Picture (match equivalent sessions MES)	Future Picture to 2036
Cricket	Spare capacity of 44 match equivalent sessions per season	Spare capacity of 26 match equivalent sessions per season
Tennis courts	Although there is sufficient supply of courts at all sites across Central Lancashire; there is a need to utilise the spare capacity on non-club community available courts to actualise substantial amounts of latent demand.	Although there is a sufficient supply of courts at all sites across Central Lancashire; there is a need to utilise the spare capacity on non-club community available courts to actualise substantial amounts of latent demand.
Bowling greens	Demand can be met with retained level of access	Demand can be met with retained level of access
Athletics	Demand can be met in Preston and South Ribble with retained access; however, there is insufficient provision for levels of demand within Chorley	Demand can be met in Preston and South Ribble with retained access; however, there is insufficient provision for levels of demand within Chorley
Cycling	Demand can be met with retained level of access	Demand can be met with retained level of access
Golf	Demand can be met with retained level of access	Demand can be met with retained level of access

The existing position for all pitch sports is either demand is currently being met or there is a shortfall. For football, all analysis areas evidence shortfalls at one or more pitch formats, with these shortfalls increasing and including new shortfalls at some formats through future demand increases. There are key present and future shortfalls for full sized 3G pitches for football team training and cricket, as well as for senior pitch types for rugby union and rugby league.

Some shortfalls can be reduced through maximised access to future provision, for example, certification and use of 3G pitches for competitive football, rugby union or rugby league match play would create extra capacity to reduce grass pitch shortfalls as well as the shortfalls evidenced for 3G pitches for football team training.

A summary of quality of playing pitch ancillary facilities at Councils owned pitches is below.

Site name	Ancillary Facility Quality
Astley Park	Good
Fairview Youth and Community Centre	Good
Gillett Fields, Limbrick	Poor
Gillibrand Playing Pitches	Good
Great Greens Lane Playing Pitch	No changing rooms
Jubilee Playing Pitches	No changing room
King George V Field	Poor
Wigan Lane Playing field	No changing room

KEY OBJECTIVES –

- Retain Green Flag sites and aspire that all sites will meet the standard
- Engage in the Local Plan to ensure that open space, sport and recreational facilities are provided and enhanced through new development
- To increase the number of allotment sites to meet demand
- To address Climate Emergency through the strategy delivery focusing on retention and enhancement of open space including tree planting, upland peat bog restoration, air quality and natural flood management.
- To increase user satisfaction in our parks, open spaces and sports facilities over the next 10 years as measured by the annual resident's survey.
- To increase community involvement and partnership working in open space and sports facility management through the duration of the strategy delivery.
- To invest in sports facilities to improve current provision and increase the number of artificial grass pitches to enhance health and wellbeing for all residents.

Strategy Action Plan

The action plan below includes all schemes from the Central Lancashire technical documents which are either high or medium priority. These include all sites which score low quality but high value in the open space assessments. These sites are not all in Council ownership, many are managed by private developers, housing associations or Parish Councils. Chorley Council will support the action plan delivery either as lead partner or in partnership with the identified stakeholder. This engagement may not necessarily include the provision of capital funding, some require the council to provide more of a supporting or enabling role. KKP identified some schemes which did not require any support or involvement from the council and so for these, the council only has a monitoring role. Some sites could simply look at altering the current management specification. The actions identified by KKP as low priority actions (many of which refer simply to 'ongoing maintenance') have been excluded for now and will be reviewed as part of the ongoing review of this action plan. Where costs are indicated these are estimates as for many of these schemes, it is only upon detailed design/specification will exact costs be confirmed. KKP applied a matrix of indicative costs to schemes as low (less than £50k), medium (£50k -£250k) and high (£250k and above).

It must be emphasised that delivery of many of these schemes is reliant on the availability of the necessary capital funding, which generally comes from external sources such as developer contributions (section 106 and Community Infrastructure Levy (CIL), which are proposed to become Infrastructure Levy (IL) with rates set by the Government linked to the financial value of the development, subject to the proposals in the [Planning For the Future White Paper](#). It is intended that Infrastructure Funding Statements, to be brought in at the end of 2020 will make planning contributions more transparent. Schemes will also be funded by external funding grants from sources which include national funding bodies such as the Football Foundation and Lottery.

The delivery of some of the projects also requires cross reference with other Council priorities and strategies. For example the CCTV strategy which defines the principles where future investment in CCTV will be considered. These are sites with historic Issues, concern from partners, high footfall areas, anti-social behaviour and if funding is in place. The bye-laws for Open Space also should be considered.

Owing to the strategy action plan being delivered over the years of 2020 – 2036 the projects are listed where possible in a rough order of deliverability with longer, ongoing projects towards the back of the action plan. Projects will be delivered as fast as possible although this is very much linked to availability of finance, demand and partnership working. Finance is being collected towards the site enhancement where possible from developer contributions. Project delivery as well as other funding

streams are being investigated. Delivery will be brought forward should funding become available sooner. Completed projects are marked with an * at the start of the project name.

Chorley Council will seek to engage from an early stage in the design process with each parish council, residents and as appropriate local facility management committees, landowners and/or stakeholder groups in all discussions about the need for investment, how each space might be used and managed and during implementation to develop local ownership, interest and respect for the different types of open space provision

New projects will be added to the OSSR over the lifespan of the strategy as sites are reassessed. Sites which are not currently in the Action Plan will be reviewed and scored in line with a standard methodology and added to the action plan and these changes reported on annually. This will be guided by further assessments of quality and provision in the Borough which will bring forward development of this action plan over the next 5+ years.

The Strategy Action Plan guides delivery of the suite of technical documents produced by KKP in 2019. These documents need to be cross referenced with the Action Plan to provide full clarity. Sites which scored low quality in the original study are rescored once a project is delivered and complete. The scores are then amended to reflect the current status. The technical documents will be revisited by consultants during the lifetime of this Strategy Action Plan to update targets and quality and quantitative data. Annual monitoring reports will be published to monitor progress of the action plan and report any changes to the provision in the Borough. This report will highlight achievements and setbacks and will realign targets where necessary.

.

NOTE- sites marked with * indicate that this project is complete or fully funded and in progress.

OSSR 2020-2036 Projects

Site name and reference.	Ward	Function/ Open Space Typology	Brief Site Description	Ownership	What is needed	Lead partner/Supporting Partners	Estimated costs where applicable
*Tatton Recreation Ground	Chorley East	Provision for children and young people	Play equipment and safety surfacing. Complete Aug 20	CBC	Part of wider masterplan for the area Upgrade of play area.	CBC/	£10,000 MHCLG funding and £10,000CIL
*Wymott Park Ulnes Walton	Lostock	Provision for children and young people	Play equipment. Complete 2020	CBC	Upgrade of the play equipment.	CBC	£8,000 MHCLG Funding. £13,500 S106
*Longfield Avenue	Coppull	Provision for children and young people	Play provision. Enhancement of the open space and play area in partnership with Jigsaw Homes. Complete June 21	CBC	New fencing, gates, paths and play equipment in place along with enhanced road safety crossing.	CBC/Jigsaw	£99,000 Jigsaw Homes, S106 Chorley Council

Monitoring

Monitoring of this OSSRA Strategy Action will be undertaken more regularly than the formal review of the suite of evidence documents and will be linked to the monitoring and reporting of the use of developer contributions as required by the Community Infrastructure Levy (Amendment (England) (No. 2) Regulations 2019).

From December 2020, the council is required to publish The Infrastructure Funding Statement which will include details of projects which the council intends to fund either in full or partially using developer contributions.

Therefore, the delivery of the OSSR Strategy Action Plan will be monitored throughout the year and performance reported annually.

Glossary

Capacity is the amount of play a site can regularly accommodate (in the relevant comparable unit) for community use without adversely affecting its quality and use. This is typically outlined by the NGB

Overplay is when a pitch is used over the amount that the carrying capacity will allow, (i.e. more than the site can accommodate). Pitches have a limit of how much play they can accommodate over a certain period of time before their quality, and in turn their use, is adversely affected.

Spare capacity is the amount of additional play that a pitch could potentially accommodate in addition to current activity. There may be reasons why this potential to accommodate additional play should not automatically be regarded as actual spare capacity, for example, a site may be managed to regularly operate slightly below its carrying capacity to ensure that it can cater for a number of friendly matches and training activity. This is investigated before the capacity is deemed actual spare capacity.

Match equivalent sessions is an appropriate comparable unit for pitch usage. For football, rugby union and rugby league, pitches should relate to a typical week within the season and one match = one match equivalent session if it occurs every week or 0.5 match equivalent sessions if it occurs every other week (i.e. reflecting home and away fixtures). For cricket pitches, it is appropriate to look at the number of match equivalent sessions over the course of a season and one match = one match equivalent session.

Displaced demand generally relates to play by teams or other users of playing pitches from within the study area (i.e. from residents of the study area) which takes place outside of the area. This may be due to issues with the provision of pitches and ancillary facilities in the study area, just reflective of how the sports are played (e.g. at a central venue for the wider area) or due to the most convenient site for the respective users just falling outside of the local authority/study area.

Unmet demand is demand that is known to exist but unable to be accommodated on current supply of pitches. This could be in the form of a team with access to a pitch for matches but nowhere to train or vice versa. This could also be due to the poor quality and therefore limited capacity of pitches in the area and/or a lack of provision and ancillary facilities which meet a certain standard of play/league requirement. League secretaries may be aware of some unmet demand as they may have declined applications from teams wishing to enter their competitions due to a lack of pitch provision which in turn is hindering the growth of the league.

Latent demand is demand that evidence suggests may be generated from the current population (i.e. sports clubs) should they have access to more or better provision.
